**Subject:** Bad idea for government settlement

Hi

I wish to voice my objections too the government's settling of the Microsoft anti-trust case as Microsoft still hasn't made any changes necessary as ruled prior with regards to the Microsoft vs. Netscape cases.

What hope is their that any settlements now will be fulfilled.

Unless you really allow competition, we are all going to be paying ridiculous pricing for software as their will be no real choice..

Thanks, rodney gooding
